Milspec Manufacturing

Milspec Manufacturing is an Australian owned design and manufacturing company that specialises in Key and Asset Management Systems (KAMS) for Australia.

Originally developed over ten years ago, Milspec's Key Management System has proven it is reliable. Our customers include a variety of government departments, rail, utilities, telecommunications and infrastructure organisations as well as many Australian and international Defence agencies. These customers are supported in Australia with a reliable spares and technical support centre based in Albury NSW.

Milspec's Key Management System is becoming the number one choice product for managing keys. To meet increasing demand for more keys and more information Milspec launched three new systems in 2014; the KAMS-54,   and KAMS-18. These new units offer:

- Networking capability
- Modern design
- Intuitive touch screen hardware
- Smart phone compatibility

As we were originally involved with Defence manufacturing, Milspec has achieved production quality to military and aviation specifications and standards; we apply these skills and standards to KAMS and as a result offer our customers a superior Key Management System. One you can rely on.

We are proud to be one of Australia's few manufacturers that have obtained an AS9100 accreditation as well as holding AS/NZS ISO 9001-2008 certification.

We work in close partnership with our customers to ensure that we provide not only an excellent high quality   it an excellent service as well, so talk to us today about your Key Management and security needs.

Key and Asset Management Systems (KAMS)

Milspec's KAMS Unit is the most efficient and reliable management system for keys available. If you have a large quantity of keys that needs security access and traceability, the Milspec KAMS is for you.

KAMS is available for;
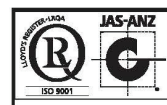

- Real Estate Key Management
- Heavy Machinery Security Access Management
- Fleet Vehicles Key Management
- Council Key Management
- Facility Management
- Weapon Lockers Management

How does it work?

The Milspec KAMS software included with each system equips key administrators with the tools and flexibility to permanently or temporarily restrict certain users from accessing specific keys and for certain dates and times. It also provides an option to reserve keys for users for a specific date and time thus preventing other users from accessing keys to assigned or per-scheduled keys.

The KAMS Unit offers control of 18 – 60 key management per cabinet. By adding and linking a Slave Unit to the Master Unit, it can quickly expand the keys capacity controlled to thousands.

The KAMS Unit key is capable of Random Key Return. This enhances the efficiency of key management by allowing users to return keys to any locations within the KAMS Unit.

KAMS will help you to

- Give certain staff particular access to certain keys
- Stop unauthorised access to restricted areas or assets
- Keep track of when keys are accessed and returned

Special features

- 18 to 60 Keys per cabinet
- Add cabinets to the same program/system
- Random Key Return
- Personalised Screen Graphic

Security Access Options available

- Touch Screen
- Card Reader
- Biometrics
- Facial Recognition
- Finger Print

Security features

- Alarms; Alerts will be sent via email or SMS when a key is not returned
- Logs all transactions; easy for audits
- Controlled Access to Keys & Assets
