

appLOK™

Installation Instructions

Step #2—Select mortice lock body

* This step may not be required if using an existing mortice lock body

Mortice lock Functions

1. Move lever handle in upwards direction to extend bolt to deadlocked position
2. Move lever handle in downwards direction to retract bolt and latch

Note: When bolt is retracted then downwards action on the lever retracts the latch only. External retraction of the latch is subject to electronic access being granted.
