CL500KEY

Flexible Key Access

The CL500KEY brings a powerful update to our trusted CL500 Mechanical Range.

The redesigned lever handle assembly offers enhanced durability for high traffic applications, along with the functionality of key override. This solution bridges the gap between the trusted CL500 range and the heavyweight CL600 range, combining robust everyday dependability the CL500 is well known for, and better management versatility with the addition of the key. Manage entry with a code, code-free operation or the override key to suit a wide range of access needs. The addition of a Key Override functionality provides a reliable back up to code access, ideal for scenarios requiring additional control or emergency override. This flexible design makes the CL500KEY an excellent choice for commercial, industrial, and residential applications.

FEATURES

- Key Override – two keys supplied
- Locks can be supplied 'Keyed Alike'
- Full size lever handles with return to door
- Suitable for wooden doors 35mm - 60mm thick
- Large three coil lever return spring for high traffic use
- 2,047 non sequential code combinations
- Code Free access and/or Back to Back options
- Compatible with PINGuard™ XT2 weather cover
- CodeLocks tubular lock/latch component CE-certified
- CodeLocks FireKit Packs can be fitted to latch for 30 or 60 minute timber doorsets - Tested in accordance with BS EN 1634-1

LOCK MODELS

Front and Back Plates

Front and back plates only. Use with existing tubular mortice latch or lock. Existing lock must have a fixing hole 22mm (7/8") below follower (spindle).

Tubular Mortice Latch

Medium duty tubular mortice latch with 'anti-shim' plunger. Latch retracts by turning inside handle freely, or the outside handle after code input.

Back to Back Option (BB)

Medium duty tubular mortice latch. Two coded plates for installation on both sides of the door. Provides coded access in both directions.

Mortice Lock

Euro profile mortice sash lock with deadbolt and latchbolt. With the deadbolt thrown it denies access.

ADDITIONAL FEATURES

Code Free Access

The CL505KEY, CL515KEY and CL525KEY models provide a Code Free option. The outside lever will retract the latch freely until disabled.

Back to Back (BB) Option

Two coded plates for installation on both sides of the door. Provides coded access in both directions.

Split Follower

The CL520KEY and CL525KEY Mortise Lock models utilise a split follower as a safety feature. This enables the inside lever to retract the deadbolt and latchbolt, after the deadbolt has been thrown, to prevent an accidental lock in.

Panic Kit Option

An extra long spindle is provided to work with most single point panic pads or bars.

Marine Grade

Selected CL500KEY models are also available in a Black, Marine Grade finish. Salt spray test up to 1000 hours.
