ACTIVATE GENERATE CONTROL

NC

KL1000

The KitLock 1000 NetCode allows temporary access to lockers and cabinets via the web-based NetCode portal.

NetCode is activated prior to the lock owner shipping and installing at a remote site. The NetCode portal allows you to register and set up your account, activate your locks and generate time-sensitive codes. Using time-sensitive codes is a more secure way to grant access as the code will not work outside a designated timeslot. NetCode is typically used for issuing codes to visiting service engineers, delivery personnel (drop boxes), and medium-term locker rental. Generated codes can be sent by email or SMS. For instant access, codes can also be generated by SMS from any pre-registered mobile phone.

**Complete Control Wherever You Are.**

GENERATE
▼

Time-sensitive codes for immediate or future use.

CONTROL
▼

Send code via email or SMS. Record time, date, duration, location and to whom the code was issued.

Your NetCode for Cabinet C/01

• 318800070870
  Unlocked 19/08/2013 11:33 for 2 hours
• 318800070870
  Valid from 19/08/2013 11:30 for 2 hours

FUNCTIONS

KL1000NC

A quick retrofit for keyed cam locks supplied as standard on a wide range of lockers, cabinets and cupboards. The keyless locks are easy to fit, taking just a few minutes to remove the existing cam lock and then making an additional top fixing for the new lock.

KL1000NC has five code levels available:

• 8 digit Master Code
• 8 digit Sub-Master Code
• 4 digit User Code
• 6 digit Technician Code
• 12 digit NetCode

The KitLock is supplied with two factory set codes:

Master Code
User Code
Before fitting change the Master and User Code.

NETCODE PROCESS

◯ Create a NetCode that will work between a start and end date - ideal for long durations.

◯ Create a NetCode that will work from a particular date and time - ideal for short durations of up to one day.

• Create an online account and register your lock on the NetCode portal www.kitlock.net
• Activate your lock and install
• The portal enables you to create NetCodes from any browser-capable, internet-enabled device
• Create codes for short or longer access periods
• Create NetCodes via SMS** for instant access
• Send codes via SMS** or email
• View history of each lock – displays all codes created for a lock including start date, duration, who received the code and any additional notes
• Customise your portal and notifications
• Ideal for remote lockers/cabinets and rental applications
