

PWS-1814E Electronic Wall Safe

Description

- Electronic Hidden Wall Safe
- This wall safe is an excellent choice for home, office, hotel, dorm or school use. Quick and convenient access, easy programming and can be installed at any height on interior wall. It's very easy to install between 2 wall studs. It comes with a velvet interior for a great plush look and feel. The keypad is flush with the safe's flange, therefore able you to hang a picture over the safe to conceal it from view.
- Since this safe is 4" to fit a standard wall between the studs. The safe is using 4x AA batteries and it includes a power override box to be able to power the safe from the outside when the batteries die. The door is spring loaded and will open by itself after the correct code is entered. After entering the correct code the motorized locking bolts will retract automatically and the door will swing open.
